THE Numb. 140.

VIRGINIA GAZETTE.

Containing the freſheſt Advices, Foreign and Domeſtick.

From Friday, March 30, to Friday, April 6, 1739.

The SPEECH *of His Excellency* GABRIEL JOHNSTON, *Eſq; Governor, and Commander in Chief of the Province of* North-Carolina, *To the General Aſſembly: At the Opening of a Seſſion begun and holden at* Newbern, *on* Tueſday *the Sixth Day of* February, 1738-9.

Gentlemen of His Majeſty's Council, and of the Houſe of Burgeſſes,

I HAVE called you together ſome Weeks ſooner than I intended, becauſe I found it the unanimous Deſire of the Inhabitants of all Ranks; and I would willingly make the Inclinations of the People, the Rule of my Adminiſtration, when-ever I can do it by Methods conſiſtent with my Duty to the King, and my own Honour.

Gentlemen of the Houſe of Burgeſſes,

I HOPE you are met together with firm Reſolutions to promote the Publick Good; to extinguiſh thoſe Diviſions and Animoſities which have ſo long prevailed; and to relieve this unhappy Colony from thoſe Calamities it has ſo long groaned under.

TO encourage you to ſet about this in the moſt effectual Manner, I ſhall inform you, that all thoſe Diſputes concerning the Rights and Revenues of the Crown, which have been carried on with ſo much Warmth for ſome Years paſt, and which engroſs'd the Attention of former Aſſemblies, are now fairly ſtated on both Sides, and laid before his Majeſty; and I am well aſſured, will be ſpeedily determined in ſuch a Manner, as to render it impoſſible for any Perſons whatſoever to revive them for the future: So that there is nothing now to prevent you from applying yourſelves to redreſs thoſe real, undiſputed Grievances, which are of infinitely greater Conſequence than any of thoſe, about which ſo much Noiſe has been lately made.

THE Eſtabliſhment of the Publick Worſhip of Almighty God, as it is the greateſt Foundation of the Happineſs of Society, and without which, you cannot expect his Protection, deſerves your earlieſt Care. That in in ſuch a wide extended Province as this, inhabited by *Britiſh* Subjects, by Perſons profeſſing themſelves Chriſtians, there ſhould be but Two Places where Divine Service is regularly performed, is really ſcandalous: It is a Reproach peculiar to this Part of His Majeſty's Dominions, which you ought to remove without Loſs of Time.

YOUR Laws, which are at preſent diſpers'd in a few obſcure, incorrect Copies, ought to be carefully Reviſed, and Printed, that the Magiſtrates may have a more plain and exact Notion of thoſe Laws they are to execute, and the People you repreſent may be better acquainted with a Matter, on which their own and their Poſterity's Lives and Fortunes ſo much depend.

YOUR Trade, Gentlemen, has always been in ſo languiſhing a Condition, that it is ſurpriſing, no Attempts have ever yet been made to ſettle it on a right Bottom; and the poor Appearances of it we have ſtill among us, ſeem every Year to decay. As Things ſtand at preſent, the People are impoveriſhed, and yet the Merchant not enrich'd; the Planter gets but a Trifle for the Fruits of all his Labours, and the Trader not capable of making any Returns. It is highly incumbent on you, Gentlemen, to ſearch this Evil to the Bottom, and not to ſuffer yourſelves to be amus'd with ſuperficial Remedies.

IF you do not think proper to give effectual Encouragement for raiſing ſome Produce that will bear a Price in a *Britiſh* Market, I am afraid all your other Endeavours will be to little Purpoſe.

YOUR Imports will always hold a Proportion to your Exports; and if nothing is ſent abroad but what is a Drug in Foreign Markets, you can bring nothing Home but the Refuſe of thoſe Markets, and that at an extravagant Price too.

I SHOULD be glad, Gentlemen, if you would take theſe Subjects into your ſerious Conſideration. You would ſoon find a very ſenſible and happy Alteration, both in Public Affairs, and your own private Fortunes, if the Aſſemblies of this Province would employ more of their Time in adjuſting ſuch important Points as Thoſe, and not ſo much of it in Matters of leſs Moment, and which have hitherto produced nothing but a great deal of unprofitable Strife and Contention.

GABRIEL JOHNSTON.

The Aſſembly ſate about Six Weeks, and made ſeveral uſeful Laws, particularly for ſettling the Manner of paying the Quit-Rents; for improving the Navigation, by Buoying out the difficult Places in the Sounds and Rivers; for encouraging the Settlement of Lands; for eſtabliſhing the General Courts at *Edenton*, appointing Circuit Courts Half-yearly, and ſettling Salaries for the Chief-Juſtice, and the Attorney-General, for attending thoſe Courts; for erecting the ſeveral Precincts into Counties, and ordering Sheriffs, inſtead of Marſhals, to be recommended and appointed, as they are in *Virginia*, &c. They alſo appointed a Committee of both Houſes, to collect and reviſe all their Laws, in order to be printed.

Theſe are the Effects of that Union and good Harmony, that ſubſiſted between the Governor and both Houſes of Aſſembly, which remarkably appeared in a much greater Degree than has been known for many Years; and affords a pleaſing Proſpect of their Welfare and Proſperity.

From a late London *News-Paper.*

Miſeris Opem Ferre.

AS thoſe two Diſtempers, the Stone and Gravel, have lately been ſo much the Diſcourſe, I thought I could not at a more proper Time make known a Remedy for thoſe deplorable Evils. Nay, indeed, I ſhould have done it ſooner, had I not been too ſenſible what a cold Reception Advice meets with that is given unask'd, occaſion'd by that ill-natur'd Maxim, *That what is gi-*

ven

ven freely can be worth little. But the ſerious Conſideration of doing Good in Relieving the Afflicted, determined me to take this Method of publiſhing a Medicine, which, by repeated Trials, ſeems to promiſe a general Service to Mankind: The Medicine is already prepared to our Hands by one of the moſt induſtrious Animals in Nature, therefore in every one's Power to come at; and as ſuch, I eſteem it one of the moſt bounteous Gifts of Providence.

'Tis HONEY: The Quantity, from Half an Ounce to Two Ounces, to be taken every Day, proportionably to the Age of the Patient, and Violence of the Diſeaſe. Many have taken it in their Chocolate, at Breakfaſt, the Morning, when the Stomach is empty, being the beſt Time, becauſe it then ſooneſt reaches the urinary Paſſages; others have taken it in Sage Tea; and many (who would not be hindered from what they call reliſhing their Breakfaſts) have taken a ſmall Spoonful of Honey at their firſt riſing, and in an Hour afterwards breakfaſted, as uſual; repeating the Doſe again at Night going to Bed, where the Supper has been light, and full 2 Hours before Bed-time. A Toaſt and Honey is an admirable Supper for Children that are troubled with theſe Maladies. It may alſo be taken in boil'd Milk, or Water-Gruel, for Breakfaſt or Supper. Thus the different Methods of taking this Medicine, and the length of Time for its Courſe, may be varied according to the Palate and Conſtitution of the Patient, always obſerving not to eat any Thing for the Space of an Hour, or more, both before and after taking it.

I would not have it thought by what I have here ſaid, that Honey will diſſolve a Stone either in the Bladder or Kidneys, but only that it will make the paſſing of ſmall Stones and Gravel more eaſy; and alſo prevent the generating of new calculous Matter: This I am convinc'd it has done, not only by my own Experience, but alſo from the Mouths of other Phyſicians, juſtly eminent of great Knowledge, and moſt extenſive Practice, who have confirm'd the good Succeſs of a conſtant and timely Uſe of this Medicine.

I forbear to ſet my Name to this, becauſe I would avoid all Imputations that either Profit, Vain-glory, or Oſtentation, have influenced me in this Affair; for all I deſign by it, is, that ſo beneficial a Remedy may become of general Uſe.

And if on more numerous Trials, 'tis ſtill found to relieve Human Nature, by leſſening, in ſome Degree, the wrecking Severities of a Fit of the Stone, and alſo to prevent the Frequency of their Returns, by lubricating the urinary Paſſages, and thereby hindering the accumulating of freſh Gravel; I ſay, if it doth continue to be thus efficacious, I ſhall then, with the greateſt Satisfaction of Mind, reflect on my making it Publick.

P. S. Perſons labouring under theſe Diſorders ought to be very temperate and cautious in the Uſe of tartarous Wines and high-ſeaſon'd Meats.

LONDON, December 12.

AS the Annana, or Pine-Apple, hath as yet made but little Progreſs in this Climate, which I preſume, is owning to the prevailing Opinion, although miſtaken one, That that Fruit is not to be perfected here, without the Uſe of Fire-ſtoves, and which, in my humble Opinion, hath been, and is the only Bar to the obtaining ſo valuable a Fruit in greater Plenty than at preſent; I beg leave therefore to inform the Publick, that, confirmed by the Succeſs of three Years paſt, it is to be done in a much eaſier, leſs expenſive Way, and meerly with as little Trouble as Cucumbers or Melons, of which any Gentlemen may be convinc'd on ſight.

Portſmouth, Dec. 3. All the Payments and Reductions are finiſh'd, only of the Lenox, Capt. Main, which will be compleated To-morrow. The Amelia being paid off, Admiral Cavendiſh has hoiſted his Flag on Board the Faulkingham; on board of which Ship To-morrow a Court-Martial will be held on Capt. Only, who lately commanded the Lively on the Iriſh Station.

Ipſwich, Feb. 10. Laſt Week was calved here an extraordinary Calf, formed as it were inſide out, the Skin being, as if flay'd from the Briſket downwards to the Rump, and to about two Thirds of the Sides, then turned back, where it grew together from the Neck to the Rump, without any Perforation, and formed one intire Covering; which when opened on the Back, the four Feet and Tail turned out, and the inſide of the Skin and the Legs were covered with Hair as common. On the outſide of the Briſket hung the Heart and all the Viſcera in their natural Form and Poſition, without any Covering; the Head and Neck only had their natural Shape and Covering. The Creature was known to have Life but a very little Time before calving, and was grown to a common Size.

New-Port, Rhode-Iſland, February 9, 1738-9.

Mrs. *Mary Haſzard*, Widow of Mr. *Robert Haſzard*, of *South-Kinſton*, and Grand-mother to the deceaſed *George Haſzard*, Eſq; late Deputy-Governor of *Rhode-Iſland*, departed this Life the 28th Day of *January* laſt, in the Hundredth Year of her Age: She was decently interred the *Wedneſday* following. This Gentlewoman has had Five Hundred Children, Grand children, and Great-Grand-children; and has now left behind her living Two Hundred and Five of the aforeſaid Number. She was eſteemed a very uſeful Perſon both to Poor and Rich on many Accounts, particularly in Caſe of Sickneſs, having good Skill and Judgment: And ſhe did all *Gratis*.

New-York, Febr. 19. On *Wedneſday* laſt the Writs were dated for electing Repreſentatives to ſerve in General Aſſembly for this Province.

On *Thurſday* the Corps of the Hon. *Robert-Lettice Hooper*, late Chief Juſtice of the Province of *New-Jerſey*, was very decently interred here: He held that important Place about Seventeen Years; and behaved ſo well, as to have few (if any) Enemies.

WILLIAMSBURG, April 6.

About *October* laſt, a conſiderable Quantity of old *Engliſh* Money was found in the Ruins of a Houſe where Col. *Bridger* formerly liv'd, in *Iſle of Wight* County, of the Coins of Queen *Elizabeth*, King *James* the Firſt, and King *Charles* the Firſt. It was firſt diſcover'd by a Negro that liv'd on the Plantation, who not knowing the Value of it, ſquander'd a good deal of it away; by which Means it ſoon came to the Knowledge of Perſons who found Means to get poſſeſs'd of the greateſt Part of it; which they converted to their own Uſes, without acquainting the Proprietor of the Land thereof. In a little Time, the Money began to circulate plentifully about that Neighbourhood, and now may be ſeen almoſt all over the Country; ſo that it's believ'd there was a large Sum of it; and if we may credit the Report of the Neighbours, there were ſome Buſhels of Gold and Silver. ------ How this Money came to be lodg'd there, or who was the right Owner of it, no one living knows; but it's conjectur'd by ſome, that it was hid there for Security.

rity, in the Time of *Bacon's* Rebellion; and by others, that it was Public Money lodg'd in Col. *Bridger's* Hands, who was in an advanc'd Station of Life, and held several Offices. However, the Owner of the Land lays Claim to the Treasure; and we hear has exhibited Bills in Chancery against several Persons, who have been known to be possessed of this sort of Money, in order to recover it. *It's a Pity he had not discover'd the Nest before the Birds were flown.*

We have the agreeable News, by a Sloop which arriv'd about 10 Days since, in *James* River, from *Bermuda*, That the Ship *Cæsar*, Capt. *Wood*, from *London*, bound for *James* River, with a great Quantity of Goods on board, for several Gentlemen, and had been so long out at Sea that she was despair'd of, was safe at *Bermuda*, where she put in to repair the Damage she receiv'd by the Violence of the Weather, having lost two of her Masts; and that she would be ready to sail in a Day or two after the said Sloop; so that she may be expected here very soon, unless prevented by contrary Winds (which have blown here several Days past) or some other Accident.

On *Tuesday* last, arriv'd in *York* River, the Ship *Hatley*, Capt. *Ralph Banks*, from *London*, after a tedious Passage of about 14 Weeks: The Captain says, there were several Ships in the *Downs*, bound for *Virginia*, when he left *Falmouth*. This Ship has brought but few Letters, and no News as we hear of yet.

The Northern *Post is not come in, at* 8 *o'Clock*, Friday *Evening*.

Enter'd in *York* River.

PROPOSALS for Printing by Subscription, A TREATISE on the DISEASES of *Virginia, and the neighbouring Colonies. In Four Parts,* viz.

I. The remote Causes of the Epidemical Diseases collectively considered, from the Circumstances of the Climate, and common Way of Living.

II. Each Disease separately stated; wherein is shewn the immediate Cause, with a Retrospect to its Connexion with the remote Cause, and the curative Part amply set forth.

III. The Reasons why Diseases translate.

IV. An Essay on Pleuritick *and* Peripneumonick Fevers, *wherein the Nature of these Diseases is fully and clearly explained; and thence is demonstrated, that the Cure both of the nervous and inflammatory Kind, consists in attenuating the Blood, save only, that Evacuation is requisite by Blood-letting and Purging in the latter.*

To which is annnxed, an Appendix, shewing the strongest Reasons, a priori, that the Seneca Rattle-Snake Root

Root *muſt be of more extenſive Uſe than any Medicine in the* Materia Medica; *and theſe Reaſons are ſupported by ſeveral Inſtances of the extraordinary Efficacy of that valuable Medicine, which ſtill more plainly directs its Uſe in* Pleuritick *and* Peripneumonick Fevers, *and other Diſeaſes. And herein is alſo demonſtrated, that this Root will ſuit the Cure of the* Small-Pox: *With Reference to Doctor* Hillary's *Treatiſe on that Diſeaſe.*

The curative Part is expreſt in a very intelligible and plain Stile, for thoſe who have not had the Advantage of Learning: And the Philoſophical Part is ſuch as requires the Attention of the learned World, in Regard that it relates to ſeveral Syſtems of Philoſophy, which connects with Facts regarding the Diſeaſes of this and the neighbouring Colonies. By JOHN TENNENT.
